WEDNESDAY, MARCH 10 • NOON
Heather L. Bernard (DNP, RN, CIC, FAPIC)
CDC Foundation COVID-19 Corps Infection Prevention and Control Specialist at NYSDOH

AN INFECTION PREVENTIONIST’S CAREER-LONG JOURNEY INTO A PANDEMIC
Heather will discuss her career as a registered professional nurse and how her journey steered her in a direction that led her straight into a pandemic response. She has been working directly with healthcare facilities with COVID outbreaks on mitigation efforts.

WEDNESDAY, APRIL 14 • NOON
Lauren Kegley
Business Development & Product Commercialization Engineer at Wolfspeed

INSPIRING THE NEXT GENERATION OF FEMALE ENGINEERS
Lauren, an engineer at Wolfspeed, works to commercialize emerging technology to help create an energy efficient future. While in industry, she is also pursuing a Ph.D. in Microelectronics and Photonics at the University of Arkansas – a program with a diverse blend of inter-disciplinary engineering, physics, and business topics. She will talk about the importance of inspiring the next generation of engineers to break down diversity gaps in science, technology, engineering and math.

You’re invited to network with and be mentored by some amazing female leaders!
