learning.center@sunyit.edu

The Learning Center at SUNYIT offers free tutoring support for students in Mathematics, Physics, Writing, and Computer Programming. We work with the support of and in conjunction with faculty to provide peer and professional tutoring in our center.

Learning Center staff work directly with the Disability Services Office to offer support to students with disabilities along with accommodations for test taking and general academic reinforcement.

We offer a comfortable environment for students to gather to complete homework assignments individually or in groups. Peer and professional tutors provide one-on-one and group tutoring with no appointment necessary. Many students find a favorite tutor they are comfortable working with and will meet with that tutor all semester and, many times, for all math classes they take at SUNYIT.
