July 15, 2020

I hope that everyone had an enjoyable July 4th holiday and a good summer thus far. This month we are trying out a new format for the Office of Research newsletter and will be refining this template over the next few installments. As always, a list of recent funding opportunity announcements from Grants.gov is included – so please peruse those opportunities and feel free to reach out to the Office of Research if you need help with preparing a proposal or finding collaborators.

Please check out the following announcement from the SAMRI program, regarding an upcoming workshop at the end of July. This will be a good opportunity to learn about potential research topics for the next SAMRI request for proposals and to hear about projects that have already been funded under this program.

**SAMRI Announcement:**

The [SUNY Applied Materials Research Institute (SAMRI)](https://example.com) is announcing the 2022 SAMRI collaborative research funding initiative. The funding initiative will kickoff with a two day workshop on **Wednesday, July 27th and Thursday, July 28th**. The first day of the workshop will be dedicated to providing an overview of the program and highlighting existing SAMRI projects. On the second day Applied Materials will introduce six topic areas: 2D materials; Power Devices (GaN, SiC, Si) and Power Device Reliability; Micro LEDs (GaN); Advanced Packaging; Photonics; and CMOS Image Sensors (CIS) Characterization. After this overview, participants will be invited to join breakout rooms for more targeted discussions on each topic. In the breakout rooms, faculty/researchers will be provided the opportunity to present very brief (1-2 slide) presentations on their work/expertise as it relates to the presented topics.

The workshops are open to researchers from across the SUNY system. In order to participate, please register at [SAMRI Workshop Registration Link](https://example.com). If you would like to present your work on one of the six topics, please provide a brief description (2 to 3 sentences) in the appropriate section of the registration form.

Best wishes,

Nate Cady
