Dear Students,

Due to tomorrow's impending winter storm, the in-person pooled testing for students, previously scheduled from 9 am - 2:30 pm in NFE-1, is being postponed.

Students with Active Badge Access: Those with active badge access should continue with the weekly pooled surveillance testing through the University at Albany.

Important Points for New & Returning Students:

- All new and returning students must meet the return requirements as outlined in the Spring 21 Plan (submission of a negative PCR, daily pre-screening, and precautionary 7 day quarantine and attestation).
- You will receive notification from our office when you have met the return requirements and your badge access will be issued / reinstated at that time.
- Upon issuance of badge access, you should immediately resume the weekly pooled surveillance testing through the University at Albany.
- Test kits for the Spring 21 semester may be picked up in the Student Services Suite, NFS 309, M-F from 9:00 am - 5:00 pm. They are in a labeled box on the reception desk and include enough sample vials for the entire semester - please take only one kit.
- The test schedule will remain the same: samples may be submitted to a UA dropbox between noon Sunday - 8 am Thursday.

New! Freedom Apartments Dropbox location: A new dropbox location has been added in the Freedom Apartments complex, directly adjacent to the CNSE campus. You can find the dropbox just outside of the Freedom Apartments office door, Building D-3 (to the right as you enter the complex).

Please let me know if you have any questions. Stay warm and stay safe!

Sincerely,

Diana Dumesnil
