March 3, 2021

***CHANGE IN LOCATION***

To SUNY Poly Albany Campus Faculty, Staff, and Students:

Weekly on-site pooled testing at the Albany campus will move to the NanoFab East 2nd floor boardroom (NFE 2107) beginning Monday, March 8. You should continue to work with Stephanie Lee to make your weekly appointment (availability between 9:00 a.m. and 2:30 p.m.). To be tested after taking part in the screening process in the NFE rotunda, walk up the staircase or take the nearby elevator and enter the HR reception area where you should follow signs to the testing area.

Albany Campus SUNY Poly Students:
- Continue weekly surveillance testing through the University at Albany. In case additional testing is needed through SUNY Poly, we wanted to let you know about this location update.

Albany Campus SUNY Poly Employees:
- For full instructions on the testing process, employees should view the details here.
- Should you be part of a "presumed positive" pool result, you will receive follow-up information about what you must do.
- All employees who work on campus must participate in surveillance testing.
- Employees who are 100% remote are not required to be tested.
- When you arrive for testing, there will be a signup sheet each week with time blocks for the next round of testing; please contact Stephanie Lee for any additional questions.
- If you are unable or do not wish to take part in the pooled testing, you will need to submit proof of a negative SARS-CoV-2 (COVID-19) PCR test result to Human Resources (results should be emailed directly to Audra Cornelius). The test must be a PCR molecular test; antigen and antibody tests will not be accepted. The negative test must be dated no earlier than the date of the scheduled pooled test and no later than three days after the date of the scheduled pooled test.
